

ACTIVITY: Heat Stress						SWI	MS No.: QSW10023	
SAFE WORK METHOD STATEMENTS (SWMS)								
Company Name: (SPP PTY LTD) T/A Ecoplant Australia & Seeddown Professional Planting			ss: 81-83 Campbell St 16 Kings Place, Bu				ACN: 638 321 847	
Company Contact: Claudia Harn	ns	Positio	on: Secretary				Phone No.: 0472 635 551	
Project Details								
Project Name:				Job Addres	SS:			
Principal Contractor (PC):	[Name, contact details]			Date SMW S	Sprovided to PC:			
Projected Start and End Dates:								
Job Description:								
High Risk Activity:	yes (if working with or ar	round m	obile plant)					
Name of person responsible for ensuring compliance with SWMS:	Supervisor			Date SWMS received:				
What measures are in place to ensure compliance with SWMS?	Pre job safety inspection	ns, Induc	ction training, Toolbox	Talk/ JSAs				
Person responsible for reviewing SWMS control measures:	Supervisor/ Team Leade	er		Date SWM reviewer:	S received by			
How will the SWMS control measures be reviewed?	Control measures review	wed durii	ng Toolbox Talk/ JSA	completion p	orior to job comm	nencement and each time a ne	ew hazard is identified.	
Training required:	WH&S General Induction for Construction (White Card)				cies Required:	Induction and		
Relevant workers must be consul	ted in the development, ap	proval a	nd communication of t	his SWMS:				
Name:	Signature:	Job Title:		Date:		SWMS Approved by Managing Director's	JOSHUA SANSOM PAUL HARMS	
Claudia Harms			Secretary		25/11/2022			
						Date prepared: 12/08/2015	Reviewed: 25/11/2022	

# **SWMS Scope**

Relevant workers can suffer illness from working in excessively hot environments (such as foundries, iron works etc). Heat is not based on air temperature alone, heat sources can come from high temperatures, radiant heat, high humidity, hot objects, or strenuous physical activity.

Heat stress illness can include:

- fainting
- heat stroke
- fatigue/exhaustion
- rashes (such as prickly heat) or heat cramps
- worsening of pre-existing medical conditions

## **Personal Protective Equipment (PPE)**

Ensure all PPE meets relevant Australian Standards, Inspect, and replace PPE as needed

AS 1319-1994 Safety signs for the occupational environment reproduced with permission from SAI Global under licence 1210-c062. Standards may be purchased at <a href="http://www.saiglobal.com">http://www.saiglobal.com</a>

Foot Protection	Hearing Protection	High Visibility	Head Protection	Eye Protection	Hand Protection	Protective Clothing	Sun Protection
C		<b>(X)</b>	(Feb.)			M	Broad brimmed hat, UV rated clothing, SPF 30+ sunscreen, tinted safety glasses with adequate UV protection)

Hazards - What can cause harm?	Risks - What can happen?	Control Measures to Reduce Risk
Job Step: Identification		
	Hazards Include:  Personal Injury:	Conduct an assessment to determine whether workers will be exposed to heat stress. Take the following into account:  - air temperature - humidity - radiant heat (sun, furnaces etc) - air movement/wind speed - workload (nature and duration) - physical capability of worker (acclimatisation, weight, fitness level, medications, existing medical conditions) - clothing and PPE required  If heat stress likely to be an issue, determine heat index using equipment such as "Wet Bulb Globe Temperature – WBGT).  Seek advice from competent persons (such as Occupational Hygienist) to assess the probable heat index if required.  If heat index indicates workers will be at risk, determine suitable controls.

Job Step: Risk Controls				
	ards Include:  al Injury:   heat stress   heat stroke   heat exhaustion   rashes/cramps	- incr - shad - shie - rem - usin - air d - loca - reso duri - ligh - prov - shie - redu - prov - usin  Ensure adeq drink a cup d environmen  Ensure perso isolation can regular cont	ons do not work in isolation under possible heat stress conditions. If not be avoided, implement a regular check-in or dead-man switch to	nged to t working in

Job Step: Symptoms			
Job Step: Symptoms			
	Hazards Include:  Personal Injury:  - heat stress - heat stroke - heat exhaustion - rashes/cramps	Ensure workers are able to recognize heat stress symptoms:  Mild heat stress:  - tired/weak  - muscle cramps  - feeling sick or vomiting  Severe heat stress:  - headache  - rapid pulse  - profuse sweating  - irritability or confusion  - blurred vision  More severe symptoms can include loss of consciousness.	
		RB: 3H Person responsible to implement control measures: RA: 2	.IVI

	Personal Injury:	If symptoms occur, relevant workers need to rest in a cool, well-ventilated area and drink cool fluids. If symptoms do not reduce quickly, seek medical help.
	- heat stress - heat stroke - heat exhaustion - rashes/cramps	To relieve acute symptoms, such as painful muscular cramps, a solution of one teaspoon of common salt to one litre of water or one teaspoon of electrolyte replacement formula to on glass of water may be drunk. This provides a quick source of salt replacement.  Do not provide cold drinks to the patient. Only cool fluids.
		With heat stroke, a person will stop sweating, body temperatures will be high (oral temperatures 40-43 degrees C), skin will be hot and dry. Confusion and loss of consciousness may occur. Seek medical attention immediately.
elop and implement ar	n emergency response plan for the site. Includ	de: Develop site-specific rescue procedures/SWMS.
<ul><li>Communicat</li><li>Consultation</li></ul>	tion methods	Ensure all workers on-site are trained and familiar with emergency and evacuation procedures.
<ul> <li>First aid equi</li> </ul>	contacts - names and phone numbers	Person/s responsible to implement and follow emergency procedures and control measures:

### Review

To ensure controls are implemented and monitored effectively:

- Toolbox /pre-work meetings will be undertaken
- Relevant persons will be consulted on hazards and contents of SWMS, work plans and other applicable information
- Control measures will be monitored throughout works:
  - Spot checks
  - Consultation
  - Scheduled audits
- Corrective actions will be recorded and rectified in a timely manner SWMS will be reviewed and updated accordingly (in consultation with relevant persons)

Ensure all controls are reviewed as per the following:

- If controls fail to reduce risk adequately
- When changes to the workplace or work activity occur that create new/different risks where controls may no longer be effective
- New hazards identified
- After an incident involving work activities relevant to this SWMS
- During consultation with relevant persons indicate review is needed
- A Health and Safety Representative (HSR) requests a review in line with the requirements of the legislation.

Person/s responsible to implement and follow monitoring and review procedures and control measures:

## **SAFE WORK METHOD STATEMENT - Part 3**

This SWMS has been developed in consultation and cooperation with *employee/workers* and relevant *Employer/Persons Conducting Business or Undertaking (PCBU)*. I have read the above SWMS and I understand its contents. I confirm that I have the skills and training, including relevant certification to conduct the task as described. I agree to comply with safety requirements within this SWMS including risk control measures, safe work instructions and Personal Protective Equipment described.

Overall Risk Ratin	g after Controls		1 Low			2 Moderate			3 High		4	Acute
Employee/Wo	orker Name	Job	Role / Po	sition		Signature		Dat	e	Time	Employer/P	CBU/ Superviso
Review No.	1		2	3		4		5	(	6	7	8
Name

				Н	IERAR	CHY OF CO	NTRC	LS				
	Risk will be		SUBSTIT	UTION ISOLA	ATION		ADMIN	I <b>ISTRATIVE</b> - W				PROTECTIVE PPE) - Where risk

**ELIMINATION** - Risk will be eliminated where possible

SUBSTITUTION ISOLATION ENGINEERING - Where risk remains, one/combination of controls will be used

ADMINISTRATIVE - Where risk remains, administrative controls will be used.

**EQUIPMENT (PPE)** - Where risk still remains, it will be reduced as far as reasonably practicable with use of PPE.

## **RISK ASSESSMENT MATRIX**

HB 436:2004 Risk Management Guidelines Tables 6.3 – 6.8 reproduced with permission from SAI Global under licence 1210-c062. Standards may be purchased at <a href="http://www.saiglobal.com">http://www.saiglobal.com</a> References: Safe Work Australia (2011) - Code of Practice: How to Manage Work Health and Safety Risks, AS/NZS 31000 -2009 Risk Management Principles and Guidelines.

#### Step 1: Determine Likelihood What is the possibility that the effect will occur? Description Criteria Almost Expected in most circumstances. Effect is a common result. certain Will probably occur in most Effect is known to have occurred at this Likely circumstances. site or it has happened. Effect could occur at the site or I've heard **Possible** Might occur at some time. of ithappening. Effectisnotlikelytooccuratthesiteorl Unlikely Could occur at some time. have not heard of it happening. May occur only in exceptional

Effect is practically impossible.

Rare

circumstances.

Step 3 Deter	Step 3 Determine the risk score									
	Consequence									
Likelihood	Insignificant	nsignificant Minor Moderate Major Catastroph								
Almost certain	3 High	3 High	4 Acute	4 Acute	4 Acute					
Likely	2 Moderate	3 High	3 High	4 Acute	4 Acute					
Possible	1 Low	2 Moderate	3 High	4 Acute	4 Acute					
Unlikely	1 Low	1 Low	2 Moderate	3 High	4 Acute					
Rare	1 Low	1 Low	2 Moderate	3 High	3 High					

lea	ealth and Salety Kisks, AS/N2S 51000 -2009 Kisk Management Filliciples and Guidelines.						
	Step 2: Determine Consequence What will be the expected effect?						
	Level of Effect: Example of each level:						
	Insignificant/Acceptable	No effect – or so minor that effect is acceptable.					
	Minor	First Aid treatment only; no lost time injury.					
	Moderate	Medical treatment; serious injuries, temporary partial disability; lost time injury < 7 days.					
	Major  Hospital admittance; extensive injuries; lost time injury > 7 days Permanent Total Disability injury; death.						
	Catastrophic	Multiple Permanent Total Disability injuries; multiple deaths.					

Step 4 Record risk score on worksheet (Note – Risk scores have no absolute value and should only be used for comparison and to engender discussion.)

Score	Action
4 A: Acute	DO NOT PROCCED. Requires immediate attention. Introduce further high level controls to lower the risk level. Re-assess before proceeding.
3 H: High	<b>Review before commencing work</b> . Introduce new controls and/or maintain high level controls to lower the risk level. Monitor frequently to ensure control measures are working.
2 M: Moderate	<b>Maintain control measures.</b> Proceed with work. Monitor and review regularly, and if any equipment/people/materials/work processes or procedures change.
1 L: Low	<b>Record and monitor</b> . Proceed with work. Review regularly, and if any equipment/people/materials/work processes or procedures change.
